PRE-WAR MILEAGE

NOW AVAILABLE

in **B.F. Goodrich**
Synthetic **TIRES** *FOR PASSENGER CARS*

SINCE 1916, an 88,000,000 mile driving test over all kinds of roads has proved that B. F. Goodrich all-synthetic rubber tends wear as well as three kinds of natural rubbers. It only remained to develop, using synthetic rubber, a complete tire that would equal the wear of the tread.

Again B. F. Goodrich "knew how" solved the problem. The Blotter type of cord, previously used only in B. F. Goodrich Truck Tires, was adapted for use in passenger car tires . . . giving the necessary added strength, endowearing qualities, and protection against bruising. This, and many other, B. F. Goodrich

features were combined to solve the problem of getting pre-war performance from passenger car tires made 90-95% from synthetic rubber. These tires are now available throughout Canada to eligible drivers.

There is still a severe shortage of all kinds of rubber. In the interest of our national war effort, motorists must observe the common sense driving rules that increase tire mileage. So . . . whether your tires are made of synthetic or natural rubber, keep within the legal speed limits, don't overload them, keep them properly inflated, have them inspected regularly by a reputable tire service man—your B. F. Goodrich dealer.

TIRE SAVING TIPS

Drive within the legal speed limits. Excessive speed causes very rapid wear, no matter if synthetic rubber tires. There are laws to drive by with within legal speed limits.

Check tire inflation regularly. Over-inflation is a cause of early tire failure. Check your tire pressure regularly, and get many extra miles.

See your B. F. Goodrich dealer inspect your tires for wear, loading, or other things that shorten tire life. He will pop you on the tires.

Again!

Get off to a flying start with a B. F. GOODRICH BATTERY

Be a battery, as on a day, the name B. F. Goodrich is your assurance of long life, and trouble-free performance. B. F. Goodrich Batteries pack plenty of power to handle all the modern accessories on your car and bring your motor to life the instant you step on the starter. Let your B. F. Goodrich battery dealer inspect your battery regularly. — It will help you start battery trouble.

RE-ROOF YOUR SUMMER HOME

Choose Borrett Roofings for Beauty—Durability—Economy

Make it one of your first jobs, after opening up the ramp this year, to inspect the roof. During winter a thick coat takes a terrific pounding from the weather and while it may seem as that light snow, weak spots quickly show for bare and leaks, resulting in discomfort and costly damage.

It is easy and economical to apply a new Borrett roof right over the old shingles. If labor is hard to get you could do the work years if by following simple instructions. Here are two types of roofing recommended for the work.

Borrett Storm Shielding

These popular, leak-proof, snow and windproof Asphalt Shingles combine beauty with the utmost in durability. Their attractive colors are fast and do not need constant repainting—they are fire-safe and assure years of dependable protection through any kind of weather.

"HOW'RE THEY BITING, SOLDIER?"

● "How'd you know I was a returned man?"
"It's the Army . . . the step and the shoulders.
What outfit?"

"Oh, the P.B.I. Went through Italy and the
Campaign of the Rhine."

"Say, that makes us huddies! Were you in the
Berlin Parade?"

"If *as* I! Why, I practically helped Hitler
commit suicide!"

"Great to be back, eh?"

"Sure is! And I made up my mind over there
. . . when I got back, I wanted to get close to
the real Canada. Over there, my love for it
used to hurt. You know what I mean."

"Yeah, I know."

"That's why I'm here, helping people from

your country and from all over the world see
what a wonderful place we got *here*."

"Well, how are they biting, soldier?"

"Guarantee your limit, chum! Step down and
meet the missus and stay a while, friend."
